

Course Name: **Supplemental Oxygen Support**

Duration: 1.00

CEUs: 0.10

Description:

This course is an optional add on to a standalone Healthcare Provider Level Basic Life Support (HCP BLS) course. There is not charge for this add on, but the content must be taught by incorporating it into an existing HCP BLS course. Oxygen content from existing Lifeguard course materials and instructor resources are used for reference.

Instructors will close out both courses once the class is complete.

Prerequisites:

Existing enrollment in a HCP BLS course.

Evaluation:

Demonstration of practical application in the context of drills and scenarios.

Outcomes:

Students will learn Supplemental Oxygen Support as an optional component, in concert with rescue breathing and CPR/AED information presented in the standard HCP BLS course.

Expectations:

Learn to incorporate supplemental oxygen into life saving efforts.

Additional information:

No additional CEUs will be awarded.
